

nan[i]on

Validation and optimization of automated patch clamp voltage-gated Ca^{2+} channel assays on the Patchliner suitable for drug discovery screening

Webinar: Tuesday 28th April 2020

15:00 (BST); 16:00 (CET); 11:00 (EDT)

Speakers:

Dr. Marc Rogers (CSO, Metrion Biosciences)

Dr. András Horváth (Application Scientist, Nanion Technologies)

A circular graphic on the right side of the slide. It contains two headshots of the speakers: Dr. Marc Rogers on the left and Dr. András Horváth on the right. The background of the circle is a blurred image of a laboratory setting, showing a patch-clamp setup with a pipette and a multi-well plate.
